

# INSTRUCTIONS

## Dry food - Single bowl feeding trial

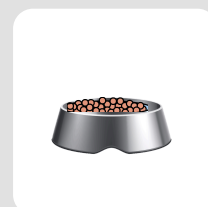

### GETTING STARTED

1. Open the feeding data portal. Complete the pet health assessment. If pets are healthy, continue the trial as instructed. If not, follow the health assessment instructions.

2. Empty the coded pet food bag into the bowl. Ensure the food has the correct code for that day of the trial. Note: 'Giant' dogs require two bags of food per feeding.

3. You're ready for the next steps.

### HOW TO CONDUCT TIMED FEEDING

1. Prepare a countdown timer for 30 minutes.

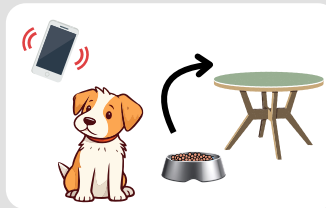

2. Place the bowl of food on the ground for your pet to start eating.

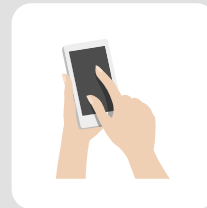

3. Immediately record the time, and start 30 minute countdown timer.

Wait 30 minutes

4. When 30 min timer alarms, pick up bowl of food, interrupting feeding if necessary.

5. Immediately record the time bowl was picked up.

### HOW TO WEIGH THE REMAINING FOOD

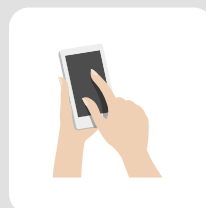

1. Turn on the scales.

2. Wait till scales zero.

3. Place bowl along with any remaining food onto the scales.

4. Record displayed weight as food left remaining.

Please note that it is intentional that this weight includes the weight of the bowl.

### AFTER FEEDING

- Ensure you have submitted the data correctly in the "Feeding data portal".
- Uneaten food can be offered again, outside of the 30 minute trial window, or stored for later use.
- Clean the feeding bowls ready for the next day/trial - they're dishwasher safe.
- Monitor your pets health throughout the trial.
